

Free Carbon Audits for UK Space Organisations

Submit your Expression of Interest

The Satellite Applications Catapult and Glasgow Caledonian University, in association with Space4Climate, invite organisations operating in the UK space sector to submit an expression of interest for a completely **free and confidential** carbon audit.

This initiative is being run by Dr Andrew Wilson (Glasgow Caledonian University) as part of the Researchers in Residence Innovation Scheme project titled "Baselining the Carbon Footprint of the UK Space Sector".

There is **no obligation** to you or your company by submitting this expression of interest.

What are the benefits of participation?

- A free and confidential report which provides your company with an understanding of its carbon footprint, with recommendations for reducing its overall impact based on the identified challenges and opportunities.
- The data collected will be anonymised and aggregated into a broader analysis which aims to gauge the approximate carbon footprint of the UK space sector through extrapolation techniques.
- This broader analysis will be presented to UKRI, UKspace and the UKSA in the form of a report, with no identifiable company information being put into the public domain (NDAs can be signed).
